

AI-readiness Assessment Report

Identify Your Data Challenges Before Your AI Deployment Does

90% of GenAI projects on structured data fail to reach production. The leading cause is unruly data that is not prepared for AI implementation.

Embarking on Agentic and GenAI initiatives without a thorough assessment of your data can lead to major setbacks. You could face significant delays, unexpected costs, and even failed deployments.

The AI-Readiness Assessment You Actually Need

illumex's AI-Readiness Assessment Report gives you a complete rundown of your current structured data AI readiness, including:

- **Data Assets Mapping:**
Complete visibility across your entire data estate
- **Health Score Analysis:**
Quantified readiness metrics for each data source
- **Completeness Evaluation:**
Identification of critical gaps requiring attention
- **Interoperability Assessment:**
Analysis of how well your systems can work together
- **Strategic Recommendations:**
Clear, actionable insights to accelerate AI adoption
- **Sensitivity Classification:**
Mapping of sensitive data to support responsible AI governance

Why This Matters to You Now

- **Accelerate AI Adoption:**
Address key challenges before they derail your projects
- **Enhance AI Governance:**
Guarantee responsible handling of sensitive data
- **Gain a Competitive Edge:**
Deploy Agentic AI with confidence while others are still figuring out their data
- **Optimize AI Investments:**
Focus resources where they'll deliver maximum impact
- **Develop a Fact-Based Roadmap:**
Build your AI strategy on a solid data assessment
